

Greater Manchester Law Centre

Fighting together for free access to justice

The right to justice is as important as the right to health or education. Without access to legal advice and representation, justice is denied to the most vulnerable.

■ Legal aid and advice services are under threat, but we defiantly opened in 2016.

■ Our welfare, housing and employment services are free, professional and face-to-face.

WE

■ campaign for access to justice across Greater Manchester

■ support the next generation of social welfare lawyers

■ challenge legislation and policy through strategic litigation.

Run by the community, for the community.

We need your support.
